

What's in the formula?

Bromelain: A protein digesting enzyme found in the pineapple plant that offers many health benefits. Known for its potent digestive and anti-inflammatory properties, bromelain can be used to break down mucous in the airways and alleviate symptoms associated with influenza. The enzyme also improves the uptake of nutrients and applied drugs, whilst reducing cell stress and activating a healthy immune response. Recent scientific evidence has emerged demonstrating the antiviral properties of bromelain specifically against the SARS COV-2 virus. The enzyme has been shown to break down the viral spike protein and viral receptors on the host cell, all of which prevents the viral molecules from penetrating the cell and causing infection.

Vitamin C: a powerful antioxidant that helps the body repair and fight off infections. Sodium ascorbate is a stable form of Vitamin C which is more easily absorbed and remains in the body for a longer period of time.

Zinc: helps support a healthy immune system and improves metabolic function.

100% NATURAL ENZYME FROM PINEAPPLES
HIGH ACTIVITY IN A STABLE FORMULATION

>4x MORE
ACTIVITY
THAN THAT OF ITS CLOSEST COMPETITOR

10
YEARS

spent developing
our sophisticated
manufacturing
process

Bromelain is used as a supportive therapy for:

- Colds and flu
- Sinusitis
- Congestion
- Coughs and a sore throat
- Aches and pains
- Inflammation

Super Bromelain

A multi-action formulation
designed to boost the natural
immune system

Enzyme Technologies is a 100% South African owned biotechnology company which specialises in developing high quality bromelain (pineapple enzyme). Although bromelain offers a host of powerful health benefits, other products on the market are notorious for being poor in quality and shelf life. Our products demonstrate considerably greater purity, therapeutic activity and longer shelf life compared to other competitors. Currently the only manufacturers of bromelain in South Africa, Enzyme Technologies carries  **FSSC 22000** ISO certification, a globally recognised food safety accreditation endorsed by the Global Food Safety Initiative (GFSI), which enforces strict food quality management systems.

A proudly South African, certified Halaal product manufactured in KwaZulu-Natal using locally sourced pineapples. Suitable for vegans and vegetarians, and free of: gluten, wheat, dairy, nuts, yeast, sweeteners, artificial flavours and colourants.
